

Article Preparation Guide: The Science of Nature

Step 1

Read aims and scope of the journal very well. Below description is explaining aims and scope of the journal which is also available at <https://www.springer.com/journal/114/aims-and-scope>

Aims and Scope

The Science of Nature - Naturwissenschaften - is Springer's flagship multidisciplinary science journal. The journal is dedicated to the fast publication and global dissemination of high-quality research and invites papers, which are of interest to the broader community in the biological sciences. Contributions from the chemical, geological, and physical sciences are welcome if contributing to questions of general biological significance. Particularly welcomed are contributions that bridge between traditionally isolated areas and attempt to increase the conceptual understanding of systems and processes that demand an interdisciplinary approach.

The Science of Nature - Naturwissenschaften - publishes five types of papers: Reviews, Original Articles, Concepts & Synthesis, Short Communications, and Comments & Replies. All manuscripts are subject to peer review.

Step 2

If your paper is matching with these guidelines, go on to check the **Instructions for Authors** available at; <https://www.springer.com/journal/114/submission-guidelines>

This section contains how you should format the paper according to the journal's requirements. It contains guidelines for preparing title page, formatting text, Formatting headings, including citations, preparation of list of references, table formats etc.

To avoid desk rejection, it is important to comply with each and every formatting guideline stated herewith.

The steps required for submission will be provided to you once the scientific committee decides on the suitability of your paper to the journal.
